

### Welcome to Oriental Electronic Co.,Ltd

Oriental Electronic is engaged in designing, developing and producing thermoelectric cooling module (TEMS) and TEMS application products. The Company occupies an area of 20,000 m<sup>2</sup> with a covered area of 10,000 m<sup>2</sup>. There are 150 employees serving for the Company, amongst them 25 are technical staffs. The Company has successfully obtained ISO9002 and SGS Certification.

The leading product of the Company is semicon cooling device, which is a new cooling technique utilizing the notable peltier effect of semicon couple. The product has the characteristics as being small in volume, light in weight and of long length of life and high reliability. Therefore it is widely used in military, aviation, electronics, medical and other civil areas. The Company's annual output capacity of cooling devices has reached 1.5 million pieces. We have strong technology strength, complete special equipment and strict quality control. The products of our company are designed, produced, selected and examined by the standard of military products. Our products have excellent performance, high reliability and various specifications. Taking 'unity, struggle, reclamation and advance' as her spirit, 'providing high quality, reliability to customers' as her ideal, 'developing semicon cooling technique' as her aim. We will contribute much more to the world's progress and development in the new high-tech field.
